New Mentorship Resources for Faculty

The Office of Faculty Development endeavors to facilitate and support mentorship. Mentoring relationships are an excellent way to enhance professional growth and improve career satisfaction.

Numerous faculty recently responded to a call for mentors, and the list is now posted on the faculty development intranet website. This list consists of a broad range of Staff Physicians and Research Scientists in a variety of disciplines. This compilation is intended to be a resource for mentees looking to initiate a mentoring relationship and to enhance opportunities to develop interdisciplinary relationships.

http://web.csmc.edu/research-and-education/faculty-development/mentorship.aspx

In support of mentorship, an upcoming Faculty Development Speaker Series event will feature a panel of faculty to provide their insights on mentorship from both a mentor and a mentee’s perspective.

Wednesday, April 29, 2015
5:00 p.m. – 6:00 p.m.
AHSP PEC 6 & 7

Faculty Mentorship Guide

For additional information on mentorship, please visit the Faculty Mentorship Guide on the intranet webpage, referenced above. This guide covers topics on roles and responsibilities of mentors and mentees, establishment of expectations, measures of success, and provides checklists for mentors and mentees.
Cedars-Sinai Academic Appointments

Appointments

Assistant Professors
Aghajanian, Paola, MD, Obstetrics & Gynecology
Binder, William, MD, Pediatrics
Chen, Zhaohui, PhD, Medicine
Edderkaoui, Mouad, PhD, Biomedical Sciences & Medicine
Forbess, Lindsy, MD, Medicine
Ho, Allen, MD, Surgery
Jeon, Christie, ScD, Medicine
Laury, Anna, MD, Pathology & Laboratory Medicine
Liang, Carol, MD, Medicine
Linhares, Yuliya, MD, Medicine
Shi, Peng, MD, PhD, Neurology
Yang, Wensha, PhD, Radiation Oncology

Associate Professors
Chen, Peter, MD, Medicine
Seferian, Edward, MD, Medical Affairs & Pediatrics
Tanaka, Hisashi, MD, PhD, Surgery

Professors
Brien, Earl, MD, Surgery
Clegg, Deborah, PhD, Biomedical Sciences & Medicine
Hogaboam, Cory, PhD, Medicine
Kaplan, Marshal, MD, Anesthesiology
Knudsen, Beatrice, MD, PhD, Biomedical Sciences & Pathology & Laboratory Medicine
Spiegel, Brennan, MD, Medicine

Promotions

Professors
Kulber, David, MD, Surgery
Orsulic, Sandra, PhD, Obstetrics & Gynecology

AAMC Early Career Women Faculty Professional Development Seminar Application Period Open

The Office of Faculty Development is pleased to once again sponsor the attendance of a junior female faculty at this informative AAMC seminar. The seminar aims to provide women with the knowledge and skills required to navigate the academic medicine enterprise as well as continue on the path to leadership. This three and a half-day seminar is designed for women Staff Physicians I and II and Research Scientists I and II who are in the early stages of leadership positions within their discipline, department or institution. Seminar attendees develop academic medicine career building skills and employ strategic thinking about their career development.

Program Details:
AAMC Early Career Women Faculty Professional Development Seminar
Date: July 11 - 15, 2015
Location: Englewood, CO
CSMC Application Deadline: March 6, 2015

To apply, please submit the following to denise.gallagher@cshs.org by March 6, 2015:
1. Self-statement outlining your interests and why you believe this seminar will contribute to your success in academic medicine. (Please limit to 250 words)
2. Statement of support from your Division Director or Department Chair
3. Up-to-date CV
Featured New Faculty

Axel Rosengart, MD, PhD, a prominent neurologist and clinical researcher whose work fostered the creation of medical devices to treat brain-injured patients, has joined Cedars-Sinai from New York Presbyterian Hospital and Weill Cornell Medical College in two key neurology posts. Rosengart will serve as director of neurocritical care and neurocritical care research. His research collaborations have focused on monitoring and helping patients with brain injuries, resulting in experimental medical devices and techniques to cool the brain, deliver drugs—such as the clot-busting drug TPA—or remove toxins from the bloodstream, and detect critical changes in patients at the bedside.

Teryl Nuckols, MD, MSHS, is a hospitalist and the Division Director of General Internal Medicine. Her primary research interest involves examining the economic implications of improving the quality and safety of health care developing the Quality-Cost Framework, which describes how quality of care can influence various types of costs. Dr. Nuckols is currently conducting a systematic review and evaluation of economic analyses to determine how often quality improvement interventions are cost-saving, cost-effective, or not a good value. Previously, at the David Geffen School of Medicine at UCLA, Dr. Nuckols was the recipient of a K08 Mentored Clinical Scientist Career Development Award from the Agency for Healthcare Research and Quality.

Rodrigo F. Alban, MD, FACS, is board-certified in surgery and surgical critical care. His areas of expertise include management of severely injured trauma patients, complex general surgery patients, improvement in quality and outcomes, and resident education. Prior to joining Cedars-Sinai, Dr. Alban was the director of Surgical Research and program director of the Acute Care Fellowship program at Orlando Health, Florida. Dr. Alban’s research focuses on clinical outcomes of surgical patients and effects of performance improvement processes on overall quality and safety. Dr. Alban has received several research awards, including most recently a poster of exceptional merit award at the American College of Surgeons meeting in 2014.

New Faculty Member Attends AAMC Professional Development Seminar

In December 2014, the Office of Faculty Development sponsored the attendance of Deborah Clegg, PhD, at the AAMC Mid-Career Women Faculty Professional Development Seminar. Dr. Clegg joined the Diabetes and Obesity Research Institute in the Department of Biomedical Sciences last summer. She is a leader in the field of women’s health research, and was selected to attend the seminar because of her keen interest in enhancing her mentorship abilities.

“I recently had the opportunity to the AAMC Mid-Career Women Faculty Professional Development Seminar which I found provided important information for advancing ones career. Concepts such as having an ‘elevator speech’ which is a short, almost Tweet, about your science and uniqueness, prepared to be used whenever you have the opportunity to promote or discuss your career with someone. This concept of having one of these was extremely interesting and a concept that requires practice because it does take one out of their comfort zone!! The conference also strongly encouraged that we not only have mentors in our career, but also sponsors. They emphasized that these two people are indeed different and that they have different impacts on your career.”

Deborah Clegg, PhD
