**Medication:** Enoxaparin (Lovenox®)

**Uses:** Prevents and treats clots in blood vessels

**Administration:** Subcutaneous Injection

**Potential Side Effects:**
- Pain, burning, or swelling where the shot is given
- Any unusual bleeding

(The side effects listed above are those that occur most frequently. Other side effects may occur; please contact your doctor to report any new medical problems!)

**Warnings:**
- Inform your doctor if you are:
  1. allergic to enoxaparin, heparin, pork products, or any other food or medicine.
  2. currently taking blood thinners, pain or arthritis medicine, or any non-cancer related drugs.
- Ask your doctor or pharmacist before using any new medications including: prescriptions, over-the-counter drugs, vitamins or herbal supplements.

**Additional Instructions:**
- Avoid taking aspirin or medicines that contain aspirin, unless your doctor tells you to.
- Inform your doctor about any recent surgeries, or if you have ever had a stroke or heart valve replacement.
