**USES:** To treat metastatic colorectal cancer

**ADMINISTRATION:** Intravenous

**Potential Side Effects:**
- Muscle weakness, tiredness
- Fever
- Nausea/vomiting
- Constipation, diarrhea
- Rash
- Difficulty breathing

(If you experience any of the side effects listed in **Bold** please contact your doctor immediately. The side effects listed above are those that occur most frequently. Other side effects may occur; please contact your doctor to report any new medical problems!)

**Warnings:**
- Inform your doctor if you are:
  1. allergic to any food or medicine
  2. taking any non-cancer related prescriptions or over the counter drugs
- Ask your doctor or pharmacist before using any new medications including: prescriptions, over-the-counter drugs, vitamins or herbal supplements.

**Additional Instructions:**
- If you develop a rash while receiving this medication; inform your physician immediately.
  1. Your physician may prescribe an antibiotic for you to take by mouth or to apply to your rash.
  2. Do not apply any topical corticosteroid creams or ointments (e.g.: hydrocortisone) to the affected area unless directed to do so by your doctor or nurse.
  3. Minimize your sun exposure by wearing sunscreen and a hat.
