**Medication:** Testosterone

**Uses:** To treat a lack of the hormone testosterone not being adequately produced by the body. It may also be used to treat breast cancer in women.

**Administration:** Intramuscular

**Potential Side Effects:**
- Yellowing of skin or eyes
- Dark-colored urine
- Unusual bruising or bleeding
- Swelling of feet or ankles
- Mild nausea or vomiting
- Changes in sexual desire

(The side effects listed above are those that occur most frequently. Other side effects may occur; please contact your doctor to report any new medical problems!)

**Warnings:**
- Inform your doctor if you are:
  1. allergic to any food or medicine,
  2. taking any non-cancer related prescriptions or over the counter drugs
- Ask your doctor or pharmacist before using any new medications including: prescriptions, over-the-counter drugs, vitamins or herbal supplements.

**Additional Instructions:**
Be sure your doctor knows if:
- You are taking blood thinners (such as Coumadin®) or medicine to treat diabetes.
