

Does Anyone In Your Family Have Rheumatoid Arthritis? Is It Caused By Your Genes Or By The Environment?

Cedars-Sinai Medical Center is currently conducting research on the contribution of the environment and genetics to the cause of rheumatoid arthritis.

Who is Eligible?

- Anyone who has rheumatoid arthritis, and
- has one or more first degree relatives age 18 or older who would be willing to help us.

(relatives do not need to have rheumatoid arthritis or live in the Los Angeles area)
