The Nursing Research Institute at Cedars-Sinai Medical Center has an outstanding opportunity for a nurse research scientist. The faculty position serves an important and collaborative role within the institute and as a principal investigator on research projects designed to improve patient care outcomes and population health. Responsibilities include preparing sound, theoretically based research proposals to obtain extramural funding, supervising project staff, designing and executing rigorous research projects, publishing in scientific journals, and presenting research findings at local and national conferences. As a faculty scientist, will act as a consultant to individuals within the Medical Center, serve as a mentor for nursing research students and advance practice nurses, as well work with faculty and students from outside of Cedars-Sinai who wish to conduct research projects. Responsibilities also include establishing an efficacious training program for clinical staff to facilitate the implementation of research. The successful candidate will represent the Director of Nursing Research on the Institutional Review Board and other appropriate committees. Competency skills must be maintained. Cultural diversity awareness and practice are key requirements for our very diverse patient population.

Minimum requirements for the position are:

- Doctoral Degree in Nursing or one of the biological or behavioral sciences with adequate preparation and experience in research and education.
- Faculty appointment at an institution of higher learning
- Formal and systematic training in scientific research.
- Strong working knowledge and past experience with the design of research studies, selection of appropriate data sources with valid and reliable measurement methods, and statistical methods relevant to the candidate’s research interests.
- Two (2) years of experience in research experience; 2 years post doc or four years without post doc
- Record of publication in professional journals
- Demonstrated behavior reflecting creativity, initiative, persistence, the ability to think in a logical and consistent manner, and the independence of thought and motivation to experiment and study
- Highly developed communication skills including writing and public speaking
- Support for start-up will be provided. Faculty member will be expected to generate ongoing research funding
