MRI Study Co-Investigators

Co-investigators on the magnetic resonance imaging study led by Debiao Li, PhD, director of the Cedars-Sinai Biomedical Imaging Research Institute and professor of Biomedical Sciences and Imaging, include the following individuals:

- Zhaoyang Fan, PhD, research scientist, co-director of Neurovascular Imaging Research at the Biomedical Imaging Research Institute and assistant professor of Biomedical Sciences
- Yibin Xie, PhD, research associate at the Biomedical Imaging Research Institute
- Prediman K. Shah, MD, director of the Atherosclerosis Prevention and Treatment Center and Oppenheimer Atherosclerosis Research Center and professor of Medicine
- Bruce Gewertz, MD, surgeon-in-chief, professor and chair of the Department of Surgery
- C. Noel Bairey Merz, MD, director of the Barbra Streisand Women’s Heart Center and Preventive and Rehabilitative Cardiac Center and professor of Medicine
- Janet Wei, MD, cardiologist with the Barbra Streisand Women’s Heart Center at the Heart Institute
- Franklin Moser, MD, director of Clinical Neuroradiology and Interventional Neuroradiology and vice chairman of Imaging for Radiology Research at the S. Mark Taper Foundation Imaging Center.
- Daniel Luthringer, MD, director of Cardiac Pathology and Genitourinary Pathology in the Department of Pathology and Laboratory Medicine,
- Antonio Conte, MD, co-director of Operative Transesophageal Echocardiography
