

Medicare/Insurance Coverage Agreement

At this time, clients eligible for Medicare are covered for outpatient cardiac rehabilitation services for a **maximum of 18 calendar weeks**. This eligibility starts from today's orientation session. Clients that have Private/HMO insurance have been informed by the cardiac center, via phone, of their eligibility for cardiac rehabilitation, and the approximate co-payments with their plan. ***Patients that have Medicare only have a national co-payment.*** It is each patient's responsibility to verify this coverage for themselves.

In the event of a physician recommended absence, we can apply for a limited extension of services when adequate documentation is available.

Wellness and prevention programs **are not covered by Medicare**, and generally not reimbursable by third party payers. These services will be billed to you on a cash-pay basis. Cedars-Sinai does not bill insurance carriers for these services.

I have reviewed, understand and agree with the information stated above.
