

Medical Renal Biopsy Service

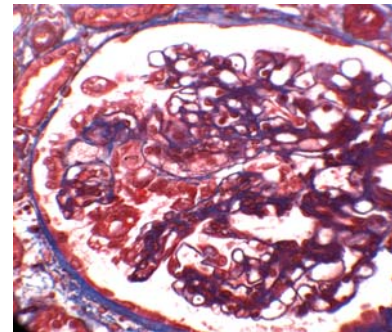

The Renal Biopsy Service is one of the largest in the country, accessioning approximately 2500 specimens annually, offering comprehensive evaluations of native kidney and transplant biopsies by sophisticated light microscopy, immunofluorescence and electron microscopy. Consultation/second opinions on renal biopsies diagnosed elsewhere are also offered.

Preliminary results are reported within one working day of receipt. Referring institutions/departments are provided a set of microscopic slides, and if requested, electron microscopic images. Kits, instructions for specimen collection and shipping information are provided

- HISTOPATHOLOGY SERVICES

Panel of stains

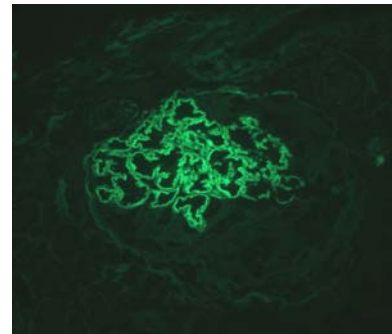

- Hematoxylin and eosin
- Periodic acid- Schiff
- Periodic acid- Methenamine Silver
- Masson trichrome
- Congo red

- IMMUNOHISTOCHEMISTRY AND IN SITU HYBRIDIZATION

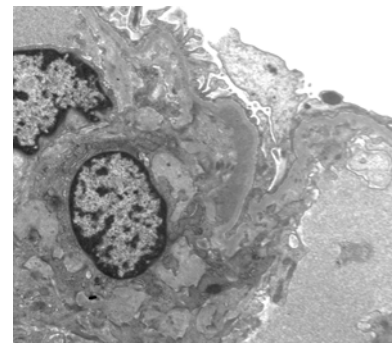

Virus

- Parvo B19
- Polyomavirus
- EB virus
- CMV, etc
- Lymphoproliferative disease work up

- IMMUNOFLUORESCENCE

- IgG, IgA, IgM
- C1q, C3
- Albumin
- Fibrinogen
- Kappa, Lambda light chains
- C4d (transplants)
- Others as indicated

- ELECTRON MICROSCOPY
