**Medication:** Gemtuzumab Ozogamicin (Mylotarg®)

**Uses:** To treat leukemia

**Administration:** Intravenous

**Potential Side Effects:**
- Nausea, vomiting may occur
- Drop in blood cell counts 7–14 days after treatment
- Mouth sores may occur
- Fatigue, weakness
- Liver problems causing weight gain or bodily swelling—not common
- **Allergic reaction such as fever, chills, rash, facial flushing, difficulty breathing**

(If you experience any of the side effects listed in **Bold** please contact your doctor immediately. The side effects listed above are those that occur most frequently. Other side effects may occur; please contact your doctor to report any new medical problems!)

**Warnings:**
- Inform your doctor if you are:
  1. allergic to any food or medicine,
  2. taking any non-cancer related prescriptions or over the counter drugs
- Ask your doctor or pharmacist before using any new medications including: prescriptions, over-the-counter drugs, vitamins or herbal supplements.

**Additional Instructions:**
- You will receive medication before Mylotarg to prevent or reduce allergy symptoms.
